  proven to reduce germs by up to 99.9 % (LogStufe 2.89 ± 0.15)

Multiple benefits

Extend the efficiency in your firm to cleaning as well. The innovative BlueEvolution steam cleaning system stands for process optimisation of a very special kind. The successful formula is very simple: a better cleaning result than before, in less time. This pleases cleaning staff and controllers alike.
BlueEvolution

The revolution in commercial cleaning

Thorough

The BlueEvolution XL+ is the ideal cleaner for your commercial space. With an output of 7,200 watts, steam pressure of 10 bar and a steam temperature of 180 degrees Celsius, the BlueEvolution XL+ can keep on cleaning long after other machines have given up. The innovative machine concept with robust housing, stainless steel front and four freely moving castors, make the XL+ the flexible cleaning pro, bringing cleanliness to the furthest corners of your production and warehouse facilities. Whether for machine cleaning, for working platforms, in administration, in healthcare and in the catering industry, the BlueEvolution XL+ always gives its all.

The pros for tight spaces

The BlueEvolution S might be slightly less powerful than its big brother, but it makes up for it in agility. Thanks to its reduced dimensions, the BlueEvolution S always stands tall whenever space gets tight. With a steam pressure of 8 bar and a steam temperature of 170°C the BlueEvolution S+ has an extra boost of power. Like its siblings, the BlueEvolution S+ is only filled with clear water, making it one of the most eco-friendly cleaning machines around.
Power on wheels

Strong functions – strongest performance

Accessories box

With the BlueEvolution you have everything to hand. Nozzles and brush attachments are stored in the well-designed accessories box. One simple step and you’re off.

Fill level display

The fill level display integrated in the housing of the BlueEvolution XL+ means users can always see the current water level at a glance, which makes work easier when you’re using the machine in large spaces. Timely refills save long trips to the next water source.

Clear control panel

The clear display of the BlueEvolution ensures full operational control. The user can always check all the status displays at a glance.

Water filter with blue light

Germs have no chance: The water filter of the BlueEvolution range also has a blue light effect to kill germs. So you get double hygiene in one machine, at no extra charge.
Make steam
We have revolutionised commercial cleaning with the professional machines of the BlueEvolution range: our innovative and HACCP-certified BlueEvolution range – comprising BlueEvolution XL+, S and S+ – delivers clear time savings and the highest hygiene. You can confidently forget all about using cleaning agents.

Stainless steel housing
With the robust stainless steel housing and its stainless steel front, the BlueEvolution not only cuts a fine figure in your company, but also guarantees reliability when used by different staff: The solid design means the BlueEvolution is shock-resistant and extremely stable. Now also available in a full stainless steel model.

Castors
Large, freely moving castors make the BlueEvolution mobile and flexible. It always performs well even on uneven surfaces. The front castors can be locked using a wheel lock. The revolving mechanism can also be fixed on the rear rollers.

green cleaning
Naturally clean
The multifunctional steam cleaner is only filled with clear water. This means users not only save on the cost of cleaning agents, but also protect the environment by doing away with harmful substances. Water consumption is reduced by around 93 % compared to conventional cleaning with buckets and cloths. This is pure green cleaning.

We reserve the right to make technical changes.
Full power for a greater clean.
Kind to the environment.

The BlueEvolution is kinder to the environment than almost any other cleaning system. It is only filled with clear water and minimises water consumption thanks to the steam pressure. There is no need for any harmful or really aggressive chemicals.

The applications of the BlueEvolution are practically limitless. The BlueEvolution really comes into its own in areas of high public traffic. Even large areas can be cleaned efficiently and quickly with little effort. The BlueEvolution is certified for use in the HACCP environment, guaranteeing results that are hygienically clean. Pathogens don’t stand a chance!
Cleaning revolution
for all industries

HACCP-certified
The BlueEvolution removes absolutely all product residues.

Process optimisation and occupational safety
Create a safe and clean working environment thanks to the high cleaning power of the beam BlueEvolution machines.

Special vehicle cleaning
You can save any amount of time and money with efficient interior cleaning, with no chemicals of any kind.

Kills up to 99.9 % of germs
Ideal for cleaning in medical practices, care homes, labs and other healthcare facilities.

Gyms, saunas and spas
It’s good for people to sweat. And thanks to the BlueEvolution it’s no longer a problem for others. All equipment and contact surfaces can be cleaned perfectly.

Masterful results
An immaculately clean construction site is your calling card, ensuring your customers recommend you.

Gleaming sales areas
The BlueEvolution is ideal for supermarkets and all retail stores.

Countless other possibilities. Find out at www.beam.de

HACCP qualification certifies the highest cleaning power

Clever use of the BlueEvolution is one of the keys to preventing infection – in labs, medical practices and catering areas.
Our company was founded over 30 years ago. We initially specialised in the production of high-pressure cleaning systems for outdoor use. We have been making steam indoors for 15 years now. Today beam GmbH is one of the most innovative suppliers of sophisticated cleaning systems. We don’t just want to impress you with great products through, but also with outstanding service, with friendliness, honesty and that certain something.
